Education

Purdue University

Bachelor of Science in Computer Science

Dean's List Student + Semester Honors

- **Certifications:** Data Science Certification + Entrepreneurship & Innovation
- **Coursework:** OOP, DSA, Software Engineering, AI, Cryptography, Computer Architecture & OS

Aug 2023 - May 2027

West Lafayette, IN

GPA: 3.6/4.0

Experience

Amazon

Incoming SDE Intern

- Interning at Amazon Stores under Vishnu Mohan

Jun 2026 – Aug 2026

Seattle, WA (Onsite)

Tredence Inc.

Software Engineering Intern

- Developed a backend reliability framework in Snowflake using JavaScript and SnowSQL to refresh upstream Airflow processes and detect 13+ recurring data anomalies to reduce manual oversight for 2 business-critical dashboards.
- Engineered a full-stack data retrieval workflow for an Agentic AI model, executing agent-generated SQL queries and rendering the output as interactive tables using React.js.
- Worked closely with senior engineers and data architects to analyze system design, data pipelines, and bottlenecks in production environments.

Jun 2025 – Aug 2025

Chicago, IL (Onsite)

Divine Labs, Indian Institute of Technology, Delhi (IIT-D)

Augmented Reality Intern

- Created an educational toolkit, comprising 6 applets, integrating Augmented Reality for IIT-D's Department of Design.
- Contributed to developing a mobile learning platform of Mathematics and English for the Digital India Initiative, deployed in 1500+ rural schools to educate over one million underprivileged children (aged 3-6).
- Used Blender for 3D modeling, Vuforia for AR Detection, along with Unity3D for prototyping, and C# for programming.

Jun 2024 – Aug 2024

Remote

Svaguna

Software Engineering Intern

- Implemented a responsive e-commerce food web application in Flutter, focusing on debugging and performance tuning to achieve a 99.99% crash-free rate.
- Architected a scalable backend using Firebase, implementing secure authentication using OAuth to process live orders and support 200,000+ concurrent users with 24/7 uptime.

Jun 2023 – Jul 2023

Mumbai, India (Onsite)

Research and Projects

Anchor | React Native, TypeScript, Mapbox, FastAPI

- Developed a cross-platform location-based mobile application utilizing Mapbox to create, visualize, and discover geo-locked digital anchors containing content for sharing purposes.
- Implemented proximity-based access mechanics by creating our own geofencing model to unlock content when users enter a defined physical radius.

Mar 2026 – Present

Human-Robot Spatial Interaction Research | Unity, C#, Blender, Python

- Designed an AR interface on XReal glasses in Unity at Purdue's CoralLabs under Dr. Ahmed Qureshi.
- Investigating human-robot negotiation, enabling robots to communicate and adjust human movements via visual cues.

Nov 2025 – Present

Game Development | C#, Unity, Blender | linktr.ee

- Published three games on the Google PlayStore, amassing over 5000 downloads.
- Achieved a top 10 finish across 6 international game jams, deploying browser and mobile games with over 2000 collective plays.

2021 – Present

Technical Skills

Certifications: SnowPro Core Certification (August 2025)

Languages: Java, C/C++, C#, Dart, Python, JavaScript, TypeScript, Kotlin, SQL, NoSQL, HTML/CSS, Assembly x86-64

Frameworks: React, Node.js, Flutter, JUnit, Flask

Developer Tools: Git, Docker, Kubernetes, AWS, Unity, VS Code, Snowflake, MySQL Workbench, Blender, MS Office
